Brinks motion activated security light manual instructions free online

4. 50 Icon, Foothill Ranch, CA 92610-3000 USA www.hamptonproducts.com • 1-800-562-5625 C - Fixture Mounting Plate REMEDY Make sure wall switch (if installed), is ON. For example, a homeowner doesn't really want to have their motion detector light come on every time a rabbit hops through their yard or a bird flies by their window. But they definitely want it to come on when someone walks up on the porch — or if there's a bear trying to get into their trash cans — and that means giving the detector enough sensitivity to catch those things. As with most technology, motion detector lights may need to be reset, occasionally, too. There can be a number of reasons for a motion detecting light to stay on, not turn on at all, or trigger needlessly, and when or if it does the goal is to get it working quickly again so it can continue to help the homeowner be protected. How to Fix Your Motion Detector DIY Style A motion light that stays on all the time does not always require professional intervention. Aim the motion sensor to the approximate center of the desired detection range. Furthermore, if you've been working on your light for some time and can't find a solution, call for help. FIXTURE ADJUSTMENT - FIGURE 3 • To rotate lamp head up or down, carefully turn thumbscrew counter-clockwise to release ratchet and allow lamp head arm to rotate • Set lamp head to desired location. These can include: bad bulbs electrical surges power outages Troubleshooting Doesn't Have to be Difficult The best way to reset a motion sensor light is to turn it off and back on again for a period of 30 seconds or longer. Many sources suggest leaving your duration setting at one to two minutes. If after trouble shooting you find that your motion detector light bulb is still not turning off, consult a security expert. Additional Reasons to Reset Motion Detector Lights After a power surge or other event that affects the electrical in a home, a motion detector light may need to be reset. But it's not difficult to reset a light. If they aren't sensitive enough, they may not come on when needed — and if they're too sensitive, they could come on too frequently. • This xture is for outdoor use only. This will reset the fixture to normal (automatic) operations. Here are some troubleshooting tips if your motion detector stays on all the time. What Causes my Light to Stay On? • When replacing the lamp (bulb), use only PAR 38 outdoor oodlight lamp (bulb) - 120 watts maximum in each lampholder. Have a person move around at the furthest distance of the desired detection area. However, you'll want to quickly troubleshoot and fix whatever the reason may be so your light bulbs don't burn out. Don't Let Your Lights Be So Sensitive Typically, motion detector light bulbs have their own unique sensitivity that you can adjust depending on their range setting. Hampton Products International Corp. When the lights do turn on, have the person stand still until the light goes off. Brink's trademark & copyright work are used with permission. LIMITED LIFETIME WARRANTY - This product is warranted to be free from defects in material and workmanship for life of product. Approximately 60 percent of convicted burglars say they would steer clear of a well-lit home with a security system. Floodlight is continuously ON. Turn RANGE (Sensor sensitivity) control more counterclockwise. The TEST mode allows the motion sensor to activate during daylight. But what if your motion detector malfunctions? d. Some motion detectors let their light glow for up to 30 minutes. This xture style may not be allowed in some areas. Several things can cause your motion detector to stay on, including age, storm damage, a power surge, improper installation, and improper settings. Turn the power OFF to the oodlight. SETTING THE MOTION SENSOR CONTROLS 1. • Do not attempt to open the xture housing. Malfunctions can also cause lights to get stuck in this mode. Get a free quote from Brinks Home™. Krista Bruton is a DFW-based writer who covers smart home security and consumer protection. Once the lights are off, have the person move again to con rm the settings. MANUAL OPERATION To manually turn the oodlight ON, turn the wall switch OFF and then ON again immediately within 2 seconds. The oodlights will turn ON and remain ON until the wall switch is turned OFF. If the wall switch was previously turned OFF for a period of time, turn the wall switch ON for at least 5 seconds and then use the OFF-ON procedure above to turn the oodlight ON manually. To manually turn the oodlight OFF, simply turn the wall switch OFF. The unit will not activate as long as the wall switch is in the OFF position. The sensor range is designed for up to 70 feet. Turn off the power and allow the xture to cool down for at least 20 minutes before working on the unit. Floodlight cycles ON and OFF. WHAT'S INCLUDED: A - Light Fixture B - Lamp Hood D - Mounting Screws (2) E - Wall Anchors (2) TOOLS REQUIRED: Screwdriver, Power Drill, 3/16" Drill Bit PRIOR TO INSTALLATION Carefully read through the entire installation instructions before installing this security light xture. - FIGURE 1 NOTE: Depending on the mounting surface of choice, it may be necessary to use the Wall Anchors (E) with the Mounting Screws (D). Know When to Hire a Professional As with all things, there comes a time when it's best to call a professional to fix your light for you. If that doesn't work, the sensor itself or the bulb may be to blame. You have purchased a safe, dependable, easy-to-install security lighting system. c. They can help you with all your outdoor lighting needs and will even give you a free estimate. If a defect occurs, call 1-800-562-5625 for instructions on how to have defective product repaired or replaced free of charge. There are no serviceable parts inside. In addition to doing these things, it is a good idea to consult your manual and double-check the settings and functions on your light. If your motion light stays on all the time, you can call a professional outdoor lighting company, or you may be able to do something about it yourself. TROUBLESHOOTING SYMPTOM Does not function at all. But it's important that they're adjusted the right way. Lamps (bulbs) are not included. 6. There are some things you can try yourself before calling for help: Test Sensitivity - Adjust your sensor's sensitivity settings and test them. This warranty gives you speci c legal rights, and you may also have other rights which vary from state to state. • The bulb and xture can get extremely hot during use. There's no sense wasting time on something that could be an easy, inexpensive fix for someone who knows more about security lights and motion sensors. It's possible that you've triggered this mode without even realizing it. NOTE: When making this adjustment during daylight in test mode, the light will remain ON for the set time duration you have selected and then turn OFF. Plug xture into grounded outlet. NOT COVERED - Product failure not relating to faulty material or workmanship, corrosion of brass components, reimbursement for installation or unauthorized service. • RANGE (Sensor Sensitivity) - Sets the sensitivity of the motion sensor. Do not over-tighten MOTION SENSOR CONTROLS - FIGURE 4 Observe the two controls on the bottom of the sensor. RESETTING TO AUTOMATIC OPERATION To return the security oodlight to automatic operation, turn the wall switch OFF for at least 5 seconds and then turn the wall switch ON. The security oodlight will come ON for the time duration set and then turn OFF. The oodlight will now activate according to the settings on the motion sensor. Leave the wall switch in the ON position to operate the oodlight in automatic mode. Turn the RANGE control (sensitivity dial) to the full clockwise rotation. - FIGURE 2 5. Once the light is OFF, it will not turn ON again until motion is detected. INSTALLATION INSTRUCTIONS CORDED 240° MOTION SECURITY LIGHT IMPORTANT SAFETY INFORMATION THIS PRODUCT MUST BE INSTALLED IN ACCORDANCE WITH ALL APPLICABLE INSTALLATION CODES. However, you can manipulate the settings so it will stay on longer. LIMITATIONS - This warranty only covers the assembled lighting products and accessories and is not extended to other components, or equipment used on the product. Connecting to a different power source may create a hazard and will void the warranty. Replacing the bulb is easy — and replacing a sensor isn't something that's normally done. WARNING: FIXTURE MUST BE PLUGGED INTO A GROUNDED, OUTDOOR RATED OUTLET THAT MEETS LOCAL, STATE, AND NATIONAL SAFETY CODES. Set the RANGE of the motion sensor. If you need professional help to fix an outdoor motion detector, call Enhanced Outdoor Lighting & Design. Position lamp holders downward at a minimum 45° and away from xture housing a minimum of 2 inches. Keep adjusting until you get it just right. To reduce false triggerings, decrease the RANGE (sensitivity). Turn the power back ON to the oodlight. High Sensitivity Setting - If your light's sensitivity setting is too high, your light may come on for the smallest triggers, such as a leaf blowing in the wind or a speck of dust that settles on your motion sensor. Direct floodlight in a slightly different direction than sensor. Install two PAR 38 outdoor oodlight bulbs (120 watts max). IF YOU ARE NOT FAMILIAR WITH THE SAFETY RATING OF YOUR OUTLET, IT IS RECOMMENDED THAT YOU SECURE THE SERVICES OF A WELL QUALIFIED ELECTRICIAN WHO CAN ASSURE THE OUTLET MEETS THE LOCAL, STATE, AND NATIONAL SAFETY REGULATIONS REQUIRED. This can be very important, since a homeowner who doesn't reset their lights may be unprotected. Long Duration Settings - In most cases, your motion detector light should only stay on for 20 to 30 seconds after it's triggered. Slide the ON TIME switch to the TEST position. You can use this xture at home for outdoor lighting applications. 999-61140 7166 REV. 06/15 Check the bulb(s) for damage. The RANGE control should — in most cases, be set at the maximum setting. 2. Congratulations on your purchase of a Brink's™ Portable Security Lighting xture. If your motion detector light bulb's sensitivity setting is too high, then even the smallest movement will turn the light on. Fortunately, it's generally not hard to reset motion sensor lights. Motion Detector Light Bulb: Why Won't The Light Turn Off? The opposite problem of your motion detector lights not turning on is when they won't turn off. • Re-tighten thumbscrew by turning clockwise. Slide the ON TIME switch to the desired time duration. The RANGE (sensor sensitivity) control is located on the bottom left. Lamp holder may say 150W. Install the Lamp Hood (B) onto the lampholder. 7. There's a possibility that your light's settings simply need to be tweaked a bit or that your unit needs to be reset. THIS PRODUCT MUST BE INSTALLED IN ACCORDANCE WITH THE APPLICABLE INSTALLATION CODES BY A PERSON FAMILIAR WITH THE CONSTRUCTION AND OPERATION OF THE PRODUCT AND THE HAZARDS INVOLVED. If the test objects that trigger your light are far away or tiny, your sensitivity setting is likely too high. Plug it back in and allow it to come back on. Stuck in Auto-On - Many lights have an auto setting that causes them to stay on all the time. • Motion Sensor performance may be affected by temperature. If the RANGE dial is at the maximum clockwise rotation and the light still has not turned on, it may be necessary to re-aim the motion sensor or the desired detection zone may be too far away. b. Turn the dial counter-clockwise to decrease the sensitivity (range). Turn wall switch OFF for at least 5 seconds and then turn switch to ON again. This never-ending glow can happen for many reasons. • Always use safety precautions. The ON-TIME (duration) switch is located on the bottom center. Another tip is to avoid placing your motion detector too close to a busy street as this may cause it to trigger unnecessarily. Speak to a security expert to better understand and adjust your light to the appropriate settings for your needs. Check Your Settings Similar to sensitivity settings, you can control how long your motion detector light bulb glows. NOT LIABLE FOR INCIDENTAL, INDIRECT, OR CONSEQUENTIAL DAMAGES. NOTE: IF FOR ANY REASON YOUR PURCHASE OF THIS PRODUCT HAS NOT BEEN A POSITIVE EXPERIENCE, PLEASE CALL OUR CUSTOMER CARE HOTLINE AT 1-800-562-5625 BEFORE RETURNING YOUR PRODUCT. For some people, one of the biggest and most important draws of a security system are its motion detector lights. These are designed to turn on and light up when detecting that someone or something is moving around in the area. FIXTURE SHOULD BE MOUNTED ON A WALL AT LEAST 8 FEET ABOVE THE GROUND FOR OPTIMAL PERFORMANCE. You should check your detector's light periodically to ensure it is working correctly. Why Would a Motion Detector Light Need Reset? With any security system, there can be occasional glitches. Covering the sensor to test the light is an option, but if the homeowner doesn't have success with that, they may choose to replace the light. Interested in monitored home security? • ON-TIME (Duration) - Sets how long the light will stay on after motion is detected (1, 5, or 10 minutes). A few issues are easy to correct without professional help. MANUAL OVERRIDE FEATURE If the security oodlight is connected to an outlet controlled by a wall switch, the Manual Override Feature is available. The Manual Override Feature allows the unit to be turned ON or OFF manually during the night, bypassing the motion sensor. Redirect security floodlight away from heat sources such as a street, active sidewalk, barbecue grill, etc. SAVE THESE INSTRUCTIONS FIGURE 1 C E D B Motion Sensor FIGURE 3 THUMBSCREW FIGURE 4 RANGE MIN RANGE MIN MAX MODEL 7166 A C ON-TIME MAX CDS 10 5 1 TEST MINUTES ON-TIME 10 5 1 TEST MINUTES Made in China © 2015 Hampton Products International Corp. For example, many lights come with settings ranging from a few seconds to an hour or more. Lower the sensitivity to track the bigger, and often more important, movements. This means movement like a butterfly flying away or a leaf falling to the ground can create light. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. 3. • Before installing this xture, be sure to check with local ordinances regarding approved outdoor lighting. INSTALLATION INSTRUCTIONS 1. If your duration setting is too long, it may seem like your motion light never turns off. Receipt or other approved proof of purchase required for warranty service. Using a higher wattage lamp (bulb) may cause a re hazard and/or damage to the unit. Warranty extends to original purchaser of product. Safety glasses and gloves should be worn during installation. Place Security Light Fixture (A) onto Fixture Mounting Plate (C). If your unit is damaged or if you think the problem is electrical, you should always ask for help because fixing it yourself could be dangerous. Be sure sensor head is pointed downward towards the target area. Run different scenarios by placing or throwing objects to see which ones trigger your light. Turn the dial clockwise to increase the sensitivity (range). Attach Fixture Mounting Plate (C) at desired location using two Mounting Screws (D). WE WANT YOUR FEEDBACK AND AN OPPORTUNITY TO PROVIDE YOU THE CUSTOMER SERVICE YOU ARE ENTITLED TO WITH OUR PRODUCTS. Slide the ON TIME switch to increase or decrease the time the light stays ON after motion is detected. • This xture is to be connected to a 120 volt, 60 Hz power source. a. You can stop your motion detector's light bulb from glowing too long by adjusting the duration settings. Reset your Motion Detector - To reset your motion light, unplug it from its power source for a full 10 seconds. QUESTIONS: For further assistance or more information, please call 1-800-562-5625, 8 am - 5 pm (Paci c Time), Monday - Friday. Image not available for Color: To view this video download Flash Player Installing a motion detector on your property is a great way to keep your home safer. However, the sensitivity (range) may need to be set lower to avoid false triggering (small animals, cars, or nearby lighting) may require range setting to be dialed down. If there is no wall switch, set circuit breaker OFF for at least 5 seconds and then turn circuit breaker ON again. 5. • Do not use near or around ammalbe/combustible material or liquids. Caution: Do not aim the sensor above the horizon as direct sunlight may cause damage to the sensor circuitry. Never use a lamp (bulb) with a higher wattage than the stated maximum allowed on the xture. This will surely give you the impression that your lights never turn off. The setting choices are 1, 5, or 10 minutes. Check that the circuit breaker, fuse and main circuit breaker or main power switch are on. A homeowner can also turn the power to it off at the breaker, in order to ensure it has time to reset itself. This should reset your light and turn off the auto-on function.
